This listing of the claims will replace all prior versions, and listings of claims in the application.

Claims

- (Withdrawn) A system for storing samples from multiple manufacturing locations comprising; a warehouse or facility for storing samples of goods; said facility storing perishable samples and providing appropriate environmental conditions necessary to keep said samples viable;
- a database for storing information concerning the characteristics of said sample.
- 2. (Withdrawn) The system of claim 1 wherein said environmental conditions comprises; humidity, temperature, and other environmental factors which are necessary to keep the samples viable.
- 3. (Withdrawn) The system of claim 1 wherein a notification system notifies users when said samples are no longer viable.
- 4. (Withdrawn) The system of claim 1 wherein said samples are stored in bulk.
- 5. (Withdrawn) A computer system for samples comprising; a database which comprises information of each sample; said database containing information regarding the number of samples from a particular supplier of a particular type.
- 6. (Withdrawn) The system of claim 5 wherein said system informs a user to order more samples when said number of samples from a particular supplier of a particular good are less than a particular number of samples.

7. (Withdrawn) The system of claim 5 further comprising; software for tracking the location of said samples.

- 8. (Withdrawn) The system of claim 5 wherein said information comprises the origin of said sample,
 - date of arrival and said sample to said facility, date said sample was produced, and conditions for keeping said sample viable.
- 9. (Currently Amended) A method for storing samples comprising; providing identification numbers to each sample received from a customer; storing said sample in environmental conditions necessary to keep said sample viable; storing information about said samples in a database; sending said sample to said customer along with information about said sample tracking delivery of said sample from a facility where said sample is stored to a final destination; tracking number of said samples stored and instructing a company when said samples need to be replenished in said facility.
- 10. (Original) The method of claim 9 further comprising; informing a customer how long it will take for said sample to be delivered to said customer.
- 11. (Original) The method of claim 9 further comprising informing a company that said samples of said company were sent to said customer
- 12. (Original) The method of claim 9 further comprising; indexing when said sample is received from a company and determining based on information received from said company when a sample is no longer viable.

- 13. (Cancelled)
- 14. (Original) The method of claim 9 further comprising; providing collateral material with said samples to potential customers of said facilities users, along with said sample.
